

Technical Project Manager

Cutting-edge technology! PXL Vision AG is a Swiss software company specialized on software-based digitization technologies for mobile and VR/AR devices. Our PXL Beam® technology is based on real-time computer vision, image processing, and machine learning. Our mission is to provide cutting-edge camera-based software solutions to increase the productivity of our customers and to enable the digital transformation of their business. PXL licenses its technology to leading hardware and software companies. For further information, please visit www.pxl-vision.com.

Your tasks! You will act as a Project Manager at PXL. In this role, you will have the unique opportunity to manage exciting and challenging projects for major B2B clients. Your main task is to lead our development team located in Armenia. This includes managing and organizing the scheduled deliverables, overseeing the communication and ensuring the quality and usability of our products. Your work will have a direct impact on hundred thousands of end users. In addition, you will have regular contact with our international customers and partners and you will have the opportunity to make a real difference in the evolution of PXL Vision AG.

Your skills! Apart from your curiosity, your communication skills and your ability to work in teams, you should meet the following requirements:

- You have finished your Master Degree in engineering, computer science, informatics or similar
- Solid general engineering and product development skills
- Experience in image processing and computer vision
- Familiar with programming languages and databases
- Familiar with mobile and desktop development
- Proven work experience in managing and leading development and QA teams
- Solution-oriented and self-driven – be the person that takes initiative and brings in ideas!
- Able to adapt and handle different tasks in parallel
- Organized and able to cope well with tight deadlines
- Fluent in English and ideally Armenian.

Not necessary, but a plus:

- Programming skills in C++, C, Java, Python
- Knowledge of VR/AR technologies
- Familiarity with operating systems iOS, Android, Windows, Linux, OS X specific details (Wi-Fi & BT protocols)

Our offer!

- An interdisciplinary, highly motivated and young team
- Responsibility and involvement in the creation of revolutionary products
- A visionary, success-oriented and creative start-up environment
- An appealing workplace in the heart of Zurich

Now! The job is available immediately. If you are interested, don't hesitate to call us (+41 44 295 10 40) or to send your complete application (cover letter, CV with a recent photo, school and work certificates) to jobs@pxl-vision.com.
